DAS Head End Power Supply

The RF Experts

The power supply unit supplies power to the backplanes serving the other modules in the system. The system is scalable and one power supply unit serves one frame of modules in the rack.

FEATURES

- Dual output connectors.
- Available for European and American mains as well as -48 VDC telecom standards.
- Front connections, easy access.
- Easily swapped.

SPECIFICATIONS

Input power voltage (AC DPU301)	86-264 VAC (50/60 Hz)
Input power voltage (-48VDC-DPU302)	38-60 VDC
Operating Temperature	-25 to +55 °C
Output ports	28 V (2 ports)
Power Rating	240 W
Width	4 rack slots
